

Living Sculpture Tree and Shrub Care, Inc.

Forester's Report 10 3 2014

Two burning permits were issued during September.

Rough Cutt mowed along City streets and the meadow in Musser Park.

The Musser Park trail was mowed and cleared of fallen branches. Deer antler rubbing protection tubes were installed on young trees in Musser Park. Grass was mowed around young trees near the east end of Salem Church Road and Windy Hill and in the meadow at Musser Park.

Conducted a animal permit site visit; consulted with various residents about tree issues, the deer management program, and where best to site a vegetable garden so as to remove the fewest number of trees.

Took down several dead elm and cottonwood trees along Angell Road. There are more to be taken down during October.
