

Forester's Report 6 30 2018

The Welcome to Sunfish Lake committee met on July 24th at the Heartland Credit Union community room. Due summer scheduling conflicts the committee decided to not meet again until early October.

Met with various residents regarding possible tree removals, how to save certain trees, emerald ash borers, and the difference between a recreational fire and a fire requiring a burning permit. One burning permit was issued during July.

Tires, a truck radiator, and miscellaneous doors dumped along Upper 55th Street were picked up and disposed of. Perhaps the City should consider purchasing signs that say video observation is in effect to deter trash dumpers.
