January 29, 2020

Forester's Report 1 29 2020

No burning permits were issued during January.

Checked City trees along City streets several times during the month. No issues and no street-side dumping observed.

Regularly checked Sunfish Lake water outlet. Water continues to flow through the new outlet system. Both Hornbeam and Horseshoe Lakes had water flowing out.

Completed seven Treeways articles for the City Website.

Attended conference seminars related to native habitat design, spotted lantern fly (a new invasive insect to watch out for), and Metro area locations with excellent examples of typical native habitats.

I recommend that Saturday, May 2nd be confirmed as Arbor Day for 2020 in the City of Sunfish Lake.

I have confirmed with Three Rivers Park District to cooperate on an aerial deer population count for the City. The last word is that the overflight will be in the next week or two.
