Forester's Report for March 2026

Hornbeam, Sunfish and Horseshoe Lakes had no outflow during March 2026 and on April 8.

We have been informed that Sunfish Lake has again qualified as a Tree City USA, for the 36th year. Congratulations Sunfish Lake.

Three burning permits were issued in March.

There have been no tree issues due to recent heavy snow events.

Street weight limit signs were installed and will be taken down once MNDOT removes weight restrictions.

A crew from Morgan's Tree Service completed the Musser Park trail clearing. Two people walking side by side can now walk the Park's trails.

The annual **Sunfish Lake Arbor Day event is scheduled for Saturday, May 2 starting at 9 AM**. This year we will be planting trees and shrubs along the south shore of Horseshoe Lake in a shoreline restoration effort. Two nearby neighbors have previously done shoreline restoration projects, so this is a continuation of shoreline improvements around Horseshoe Lake. Baby trees and shrubs will be for sale that day. Call to pre-order.
