Forester's Report for August 2026

Hornbeam, Sunfish and Horseshoe Lakes had no outflow during August 2026.

Investigated tree removals at 3 Sunfish Lane – no problems – mostly woody invasive removals.

Street edges were mowed.

Mowed Musser Park trails in preparation for trailer maintenance crew. Musser Park trails were cleared and maintained by Timberland Outdoor Services.

Met new owners of 30 Sunnyside Lane regarding tree issues in preparation for a likely new build.

Consolidated lake water samples, resident discussions, and checked Musser Park trails project completion. Resident consultations with O'Shaughnessy and Barker. Sprayed purple loosestrife at outlet of the Sunfish Lake.

Prepared for and lead Musser Park Restoration Project meeting with Co-Chair Liz Lee. Nine residents were in attendance, and all agreed that we should move forward with the project. Resident questions have been referred to the MN Land Trust for their input. A presentation is planned for the October City Council meeting.

Installed deer rubbing protection tubes on young trees in Musser Park.

Drought and heat is causing dramatic stress on young trees. If possible, water your young trees and give them a good soaking.
